Dear PoliceOne Member,

In today's world, nothing is making a bigger impact on law enforcement than video. From throwable robots to footage shot by the public, the rise of video technologies is shaping everything from training and policy to community relations and investigations.

The latest PoliceOne Digital Edition, 2018 Police Video Guide: The emerging tech, training and tactics shaping law enforcement, explores how departments can best utilize emerging video technologies to enhance police officer safety and improve operational efficiencies.

In this special P1 report, we outline the issues bystander videos present for law enforcement, discuss how to turn BWC footage into actionable data for police officer training purposes, and review how to safely store and protect your video data, among other topics.
